American
POTATO JOURNAL

Official Organ of
The Potato Association of America

VOLUME 44

JANUARY-DECEMBER, 1967

Editor-in-Chief

JOHN C. CAMPBELL

THE POTATO ASSOCIATION OF AMERICA

% Rutgers College of Agriculture and Environmental Science

New Brunswick, New Jersey 08903

OFFICERS

Charles E. Cunningham, *President*

Donald Isleib, *President-Elect*

James Munro, *Vice-President*

Henry M. Darling, *Past-President*

Robert L. Plaisted, *Secretary*

John C. Campbell, *Treasurer*

DIRECTORS

James Gregory

Robert Johansen

Paul Mosher

Fermine de La Puente

SUSTAINING MEMBERS

Starks Farms Inc. ..... Route 3, Rhinelander, Wisconsin 54501

Frank L. Clark, Founder — Clark Seed Farms ..... Richford, New York 13835

Frito-Lay, Inc. ..... 3420 Singleton Blvd., Dallas, Texas 75212

Rohm and Haas Company ..... Philadelphia, Pennsylvania 19105

E. I. du Pont de Nemours and Co. (Inc.)
Industrial and Biochemicals Dept. ..... Wilmington, Delaware 19898

McCain Foods Limited ..... East Florenceville, N. B., Canada

Claude Botkin Co., Inc. ..... 316 Haven Drive, Arvin, California 93203

Pittsburgh Plate Glass Co., *Chemical Division* ..... Pittsburgh, Pa. 15222

International Minerals & Chemical Corp. ..... Libertyville, Illinois 60048

Stauffer Chemical Company ..... 380 Madison Avenue, New York, N. Y. 10017

Sunspiced, Inc. ..... Blackfoot, Idaho 83221

Idaho Potato Packers Corp. of Idaho ..... Blackfoot, Idaho 83221

L. E. Stephens Co. Inc. ..... Blackfoot, Idaho 83221

INDEX TO VOLUME 44

SUBJECT INDEX

Abscission layer, anatomy and morphology of, in Menominee and Russet Burbank, 402.
Adventitious bud formation, factors affecting, 87.
Alkaloid levels induced, in potato tubers, 277.
Anatomy and morphology of abscission layer in two cultivars of Solanum tuberosum, 402.
Antisera, use of molecular gel column to prepare virus X inocula for, 249.
Applicator, experimental multi-band fertilizer, for potato planter, note,* 87.
Bake-King, a new variety for baking, 287.
Baked potato mealiness detection, 442.
Bisulfite, chlorogenic acid and tyrosine interaction in enzymatic blackening, 236.
Blackening, enzymatic, interaction of chlorogenic acid, tyrosine and bisulfite in, 236.
Blight, *see* Late blight.
Book review, Fundamentals of quality control for the food industry, 73.
Fungicide-nematocide test results, 1966, 185.
Plant breeding, 183.
Potato processing, 382.
The potato, 260.
Breeding for field resistance to potato virus Y, 128.
Bud formation, adventitious, factors affecting, 87.
Cells, microscopic measurement of, improvements in, 41.
Chlorine, use of, in washing potatoes, 425.
Chlorogenic acid, tyrosine ,and bisulfite, interaction in enzymatic blackening, 236.
Chlorotic foliage, genes affecting, 411.
CIPC-water emulsions, effect on external and internal sprouts, 51.
Climate chamber for leaf roll virus testing, note, 257.
Clonal potato seedling selection at widely separated locations, 24.
Colletotrichum atramentarium, pathogenicity of, in potato varieties, 241.
Color of tubers as affected by genes, 411.
Correlations among nitrogen, phosphorus and potassium in potato plant growth, 75.
Cuttings stem, potato propagation by, 301.
Densitometer, recording, use of in determining tyrosinase activity, 387.
Detection threshold of sensory panels for mealiness of baked potatoes, 442.
Diploid hybrids, performance of, 195.
Diploid and tetraploid, performance and variability of, 263.
Disulfoton, effect on tuber nematode galls, verticillium wilt and yield of Russet Burbank, 165.
Emergence and yield of potatoes, effect of physiological maturity on, 227.
Emergence, effect of tetrachloronitrobenzene on, 263.
Environment, influence of, on specific gravity, plant maturity and vigor, 107.
Enzymatic blackening, 236.
External and internal sprouts in potatoes dipped in low-concentration CIPC, 51.
Fertilization and irrigation of potatoes in Virginia, 419.
Fertilizer, experimental applicator for potato planter, note, 87.
micronutrients, influence on growth and yield of potatoes, 363.
timing of nitrogen application, 214.
Field resistance to late blight, 9.
to virus Y, testing and breeding for, 128.
Fumigation, soil, effect on verticillium wilt and nematodes, 316.
Fusarex, effect of, on emergence and yield, 272.
Genes affecting tuber color and chlorotic foliage, 411.

*Note refers to articles in News and Reviews section.

Gibberellic acid, effect on alkaloid levels in tubers, 277.
Greenhouse evaluation of potato seedlings for leaf roll virus resistance, 309.
Greening of tubers as affected by maturity and storage, 56.
Growth, effect of micronutrients on, 363.
Hail, simulated, damage, effect on yield and quality of potatoes, 347.
Hybrids, diploid and clones of Phureja-haploid, performance of, 195.
Idaho seed areas, control of leaf roll virus in, 305.
Increase of premier-foundation seed in Michigan, 218.
India, seed potato production in sub-tropical, 429.
Induced alkaloid levels in potato tubers, 277.
Insecticide, effective in delaying verticilllium wilt, 3.
Interaction of chlorogenic acid, tyrosine, and bisulfite in enzymatic blackening, 236.
Internal sprouts in potatoes treated in CIPC, 51.
Irrigation effect on turgor of Katahdin tubers, 383.
of potatoes in Virginia, 419.
Jozite, a zinc containing mixture as an additive to potato sprays, 59.
Katahdin, effect of irrigation on tuber turgor of, 383.
Lake Titicaca to New England, trail of "Irish" potato to national monument, note, 224.
Late blight, field resistance to, 9.
Leaf roll virus control program in Idaho, 305.
found in symptomless seedlings, 409.
testing, climate chamber for, 257.
resistance in potato seedlings, greenhouse evaluation of, 309.
Low-oxygen atmosphere, effect on tubers, 292.
Maine, effect of Fusarex on emergence and yield in, 272.
Maleic hydrazide, effect of, on yield and storage of potatoes in West Bengal, 123.
effect on alkaloid level in tubers, 277.
Maturity and vigor of potato progenies, influence of environment on, 107.
storage temperature and time, effect of, on tuber greening, 56.
physiological, effect on yield, 227.
Meloidogyne incognita, reaction of Solanum species to, 66.
Micronutrients influence on growth and yield, 363.
Microscopic measurement of cells and starch granules, 41.
Microwave oven may prove boon to spud grower, note, 73.
Michigan, selection of premier-foundation seed in, 218.
Moisture, effect on yield, 209.
Molecular gel column, use of, to prepare potato virus X inocula for antisera, 249.
Moore, Henry C., Obituary, 260.
Morphology of abscission layer in two varieties, 402.
Nematodes, effect of soil fumigation on, 316.
Nematode galls, effect of disulfoton on, 165.
Nicotinic acid, effect on alkaloid levels in tubers, 277.
Nitrogen fertilization timing for winter potatoes, 214.
Nutrients, interrelations among plant, effect of application levels on yield, 187.
Oxygen, *see* Low-oxygen.
Pests attacking potato tubers, changing role of, 137.
Phosphorus, nitrogen and potassium, responses of potato plant to, 75.
effect on yields, 187.
Phureja-haploid hybrids, performance of, 195.
Physiological maturity and storage temperature, effect on, emergence and yield, 227.
Plant population effect on yield and tuber-size, 17.

Potato Association of America
Abstracts of papers of 51st Annual Meeting, 333.
Annual meeting and call for papers, announcements, 105, facing 140, 145, 186.
Committees for 1967-1968, 415.
Honored, Akeley, Robert V., 324.
Eide, Carl J., 326.
Hougas, Robert W., 328.
Umphrey, Harry E., 330.
Weston, James W., 332.
Minutes of annual meetings, 376.
Program of annual meeting, 147.
Seed certification and nomenclature committee report, 255.
Potato extractives and sloughing of potato tissue, 393.
quality, as affected by simulated hail, 347.
virus-X inocula for antisera, 249.
Potassium, nitrogen and phosphorus, responses of potato plant to, 75.
Preharvest treatments, effect on turgor of Katahdin tubers, 383.
Premier-foundation seed, selection and testing in Michigan, 218.
Pre-storage washing of potatoes, 232.
Processed potatoes, effect of storage temperature on, 159.
Productivity of Russet Burbank seed potatoes, factors affecting, 153.
Propagation of potato by stem cuttings, 301.
Propanil for post-emergence weed control, 30.
Quantitative determination of tyrosinase activity, 387.
Reaction of Solanum species to root knot nematode, Meloidogyne incognito, 66.
Resistance, of varieties to late blight, 9.
Respiration of potato tissue influenced by storage temperature, 174.
Rhizoctonia, effect of soil fumigants on, 316.
Ring rot, effect of soil temperature on, 281.
Root-knot-eelworm resistance in South American tuber-forming solanum species, 370.
Root-knot nematode, Meloidogyne incognita, reaction to Solanum species to, 370.
Row spacing, effect on yield and tuber-size, 17.
Russet Burbank, effect of disulfoton on yield of, 165.
seed, factors affecting productivity of, 153.
Salts, effect of, on sloughing of potato slices, 355.
Seed potato, leaf roll control program in Idaho, 305.
potatoes, factors affecting productivity of Russet Burbank, 153.
premier-foundation, in Michigan, 218.
production in India, 429.
Seedlings, greenhouse evaluation of, for leaf roll virus resistance, 309.
selection of, at widely separated locations, 24.
Selection, testing and increase of premier-foundation seed in Michigan, 218.
Sensory panels for detection of mealiness as related to specific gravity, 442.
Sloughing of potato slices, effect of salts on, 355.
of potato tissue as affected by potato extractives, 393.
Soil fumigation, effect on verticillium wilt, nematodes and other diseases, 316.
Soil pests attacking potato tubers, 137.
Soil temperature and moisture, effect on yield, 209.
effect on ring rot, 281.
Solanum species, reaction to root-knot nematode, Meloidogyne incognita, 66.
root-knot-eelworm resistance in, 370.
Solanum tuberosum, anatomy and morphology of abscission layer of, 402.
South Africa, virus investigations in, 22.
South American tuber-forming solanum, resistance to root-knot-eelworm, 370.
Specific gravity as related to baked potatoes, 442.
influence of environment on, 107.

Sprouts, external and internal in potatoes dipped in CIPC, 51.
Starch granule microscopic measurement, improvements for, 41.
Stem cuttings, propagation of potato by, 301.
Stones, effect of, on potato yield, soil temperature and moisture, 209.
Storage, effect of maleic hydrazide on, in West Bengal, 123.
temperature and time, effect of, on greening, 56.
temperature, effect on emergence and yield, 227.
temperature, effect on processed potatoes, 159.
temperature, effect on respiration of potato tissue, 174.
Temik, a systemic insecticide effective in delaying verticillium wilt, 3.
Testing and breeding for field resistance to virus Y, 128.
premier-foundation seed in Michigan, 218.
Temperature of soil, effect on yield, 209.
of storage, effect on emergence and yield, 227.
effect on processed potatoes, 159.
Tetrachloronitrobenzene (Fusarex) effect on emergence and yield in Maine, 272.
Tetraploid, and diploid, performance and variability of, 263.
Tissue, respiration of potato, as influenced by storage temperature, 174.
Tuber-size, as affected by row spacing and plant population, 17.
Turgor of Katahdin tubers as affected by irrigation, 383.
Tyrosine, bisulfite, chlorogenic acid interaction in enzymatic blackening, 236.
Tyrosinase activity, quantitatively determined, 387.
Varietal tests in West Bengal, 204.
Variety, Bake-King for baking, 287.
testing for field resistance to late blight, 9.
Varieties, pathogenicity of Colletotrichum atramentarium on, 241.
Verticillium wilt, delayed by Temik, 3.
effect of disulfoton on, 165.
effect of soil fumigation on, 316.
Virginia, fertilization and irrigation of potatoes in, 419.
Virus investigations of potatoes from South Africa, 22.
leaf roll, control program in Idaho, 305.
found in symptomless potato seedlings, 409.
greenhouse evaluation of resistance for, 309.
testing, note, 257.
Virus X, preparation of, inocula for antisera, 249.
Virus Y, testing and breeding for field resistance to, 128.
Vorlex, effect on verticillium wilt and nematodes, 316.
Washing potatoes, pre-storage, 232.
potatoes with solutions containing chlorine, 425.
Weed control with propanil, 30.
Wells, P. A., honored, 182.
West Bengal, effect of maleic hydrazide on yield and storage in, 123.
potato variety tests in, 204.
Wilt, *see* verticillium.
Winter potatoes, effect of nitrogen on, 214.
Yield and tuber size as affected by spacing and plant population, 17.
effect of disulfoton on, 165.
effect of maleic hydrazide on, in West Bengal, 123.
effect of micronutrients on, 363.
effect of nitrogen, phosphorus, and potassium on, 75, 187.
effect of stones, soil temperature and moisture on, 209.
effect of tetrachloronitrobenzene on, 272.
Zinc-containing mixture, Jozite, as an additive to potato sprays, 59.
